

This 7-day intensive biogas training is designed to provide plant operators, decision makers and investors with profound specific operating and engineering knowledge. The training will be conducted in **English** and will include:

- **4 days of training** through presentations and practical exercises
- **3 days of visits to biogas plants** with new or ground-breaking concepts or technology in Germany

For the duration of the event, all participants will get in contact with the planners, component manufacturers and biogas plant operators.

Who will benefit from this event?

- Biogas plant operators & staff
- Farmers planning to operate an AD-facility
- AD developers
- Academic institutions
- Central & local government officials engaged with AD
- Banks & investment houses, private investors

In this training we focus on **combining practical experience with theoretical and scientific knowledge**. IBBK Fachgruppe Biogas GmbH and University of Hohenheim, the organisers and trainers of this event, merge their experience and scientific standing to provide you the opportunity of meeting with senior experts of the German Biogas Industry.

Dedicated time for discussion and exchanging experiences ensures that every participant can get the best out of the course.

Early bird discount available: Special rate for booking and paying until August 19th, 2017: 1950* € instead of 2150* €.

General program topics (Program is subject to change)

- Current situation and prospects in Germany and Europe
- Choosing the right substrates
- Introduction into plant technology
- Experiences with bio / food waste plants
- Start up phase and practical measures
- Introduction into design, planning and process engineering
- How to digest high fibrous and N-rich feedstocks
- Safety features of biogas plants and equipment
- Pretreatment and prestorage technology
- Prospects of biogas utilisation
- Decision criteria for a biogas plant
- Ecological manure management
- Planning and designing of stirring and mixing technology for digesters
- Process requirements for the mono-digestion of chicken manure

Event fee per person

The complete package price for the event is **2150 €**. **Early bird rate** available for registration and payment before August 19th: **1950 €***.

*Offer valid only if the payment is received on our account before August 19th, 2017. **All prices plus 19% VAT**. If there's a VAT registration number of your company available and your country belongs to the EU, we won't have to charge VAT.

Included:

- Presentations and tour documentation
- Transport to and from plant visits
- Lunch and beverages during the course
- Excursions and entrance fees

NOT included:

- Travel to and from Stuttgart
- Accommodation
- Further meals and beverages

Registration form – please provide billing address and send this registration form by email to: t.gruszkos@biogas-zentrum.de

With my signature I agree: 1) that I have read and accepted the terms and conditions stated on this registration brochure and 2) that the photos, videos and audio recordings made during this event can be used to advertise upcoming events.

Terms and conditions:

After receiving your signed registration, we will send you the confirmation and bill by e-mail. Registration is legally binding. **Written cancellations are possible until August 19th, 2017** for an administration charge of 250 € (plus 19% VAT). After **August 19th, 2017** cancellations are billed in full. In case of cancellations we gladly accept a substitute participant. Participants will be debited with incurred bank charges.

The organizer reserves the right to cancel this event for any unforeseeable reason. If the organizer cancels the event, the full participation fee will be refunded, but no other costs which may have occurred can be claimed. Participants look after their own insurance requirements. The organizer is not liable to personal injuries, lost property or any other personal damage, which might have occurred in connection with any of our events.

About IBBK:

Anaerobic digestion is a means to produce renewable energies and manage several types of waste and biomass at the same time. This is a challenge and requires constant awareness and best available technology.

IBBK focusses on providing profound AD knowledge on national and international level through:

- **Training Courses**
- **Study Tours**
- **Expert talks and workshops**
- **Conferences with exhibition**
- **Operating and engineering consultation for existing and future biogas plants**

See our events calendar on our website www.biogas-zentrum.de to find your biogas event in 2017. If you want to be kept in the loop about all future IBBK news and courses please write a short inquiry to info@biogas-zentrum.de and you'll receive our newsletters.

Customised Courses and Tours:

You know the biogas basics and need special information? Contact us and we will develop a customised training or tour for you.
